A different kind of control freak

UTAK manufactures a wide variety of stock controls for Drugs of Abuse, Therapeutic Drug Monitoring and esoteric toxicology analysis, using meticulously sourced 100% human matrices and the purest drugs possible, for labs around the world. We've also earned a reputation for personalized controls, created in small batches to fit the specific needs of customers. Our secret ingredient is our passion for control—driven by our mission to create control, one sample, one test, one life at a time.

Because every result matters when you're a control freak.

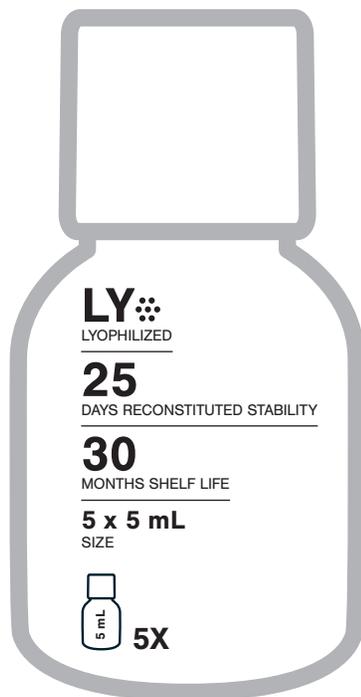

About UTAK

UTAK was founded in 1973 by Larry Plutchak, a chemist in the LA Coroner's office. Frustrated by the difficulty in verifying the calibrations of the lab's analytical instruments, Larry founded UTAK with his wife Judy, in order to give toxicology labs access to the control materials they needed. Under the leadership of Larry's son Jim Plutchak, UTAK has perfected the practice of using flexible manufacturing practices to create unmatched control materials, and remains committed to Larry's mission of bringing greater control to toxicology.

Starting Matrix

SMx Serum

REF 35700-SMX-S(F)

Our Specialty Matrix (SMx) Serum is a synthetic product designed specifically to mimic real human serum while eliminating unwanted endogenous analytes. UTAK's SMx Serum is an alternative to buffer solutions or stripped serums that are not representative of human matrix. SMx Serum minimizes matrix effects that occur in other synthetic serum products.

SMx Serum can be used on any testing platform, including LCMS, LC-MS/MS, GCMS, and Time of Flight (TOF).

Starting Matrix

Defibrinated Plasma

REF 44600-D(500)

Our 100% Real defibrinated plasma is collected from healthy adults in FDA-licensed facilities within the United States. We screen our defibrinated plasma for common drugs of abuse and alcohol.

This product contains no preservatives and is suitable for all testing methods, including LCMS, LC-MS/MS, GCMS, Time of Flight (TOF), ELISA, EMIT and other immunoassays.

Starting Matrix

Normal Human Serum

REF 44600-S(500)

Our 100% Real Normal Human Serum is collected in FDA-licensed facilities within the United States from healthy adult donors. We screen our Normal Human Serum for common drugs of abuse and alcohol.

Our frozen serum is suitable for all testing methods, including LCMS, LC-MS/MS, GCMS, Time of Flight (TOF), ELISA, EMIT and other immunoassays. This product uses Potassium Oxalate as an anticoagulant and Sodium Fluoride for preservation.

Starting Matrix

Certified Drug Free Urine

REF 88121-CDF(F)

Our 100% Real Human Urine is collected from healthy donors within the United States. We screen our urine for common drugs of abuse.

Our frozen urine contains no preservatives and is suitable for all testing methods, including LCMS, LC-MS/MS, GCMS, Time of Flight (TOF), ELISA, EMIT and other immunoassays.

Starting Matrix

Certified Drug Free Urine

REF 88121-CDF(L)

Our 100% Real Human Urine is collected from healthy donors within the United States. We screen our urine for common drugs of abuse.

Our liquid urine contains Sodium Azide for preservation and is suitable for all testing methods, including LCMS, LC-MS/MS, GCMS, Time of Flight (TOF), ELISA, EMIT and other immunoassays.

Starting Matrix

SMx Urine

REF 36000-SMX-U(F)

Our Specialty Matrix (SMx) Urine is a synthetic product designed specifically to mimic real human urine while eliminating unwanted endogenous analytes. SMx Urine is an alternative to buffer solutions that are not representative of human urine. Our proprietary synthetic urine formula matches human urine in pH and specific gravity.

SMx Urine can be used on any testing platform, including LCMS, LC-MS/MS, GCMS, and Time of Flight (TOF).

Starting Matrix

Blank Whole Blood

REF 44600-WB(F)

Our 100% Real Whole Blood is collected in FDA-licensed facilities within the United States from healthy adult donors. We screen our whole blood for common drugs of abuse and alcohol.

Our frozen blank whole blood is suitable for all testing methods, including LCMS, LC-MS/MS, GCMS, Time of Flight (TOF), ELISA, EMIT and other immunoassays. This product uses Potassium Oxalate as an anticoagulant and Sodium Fluoride for preservation.

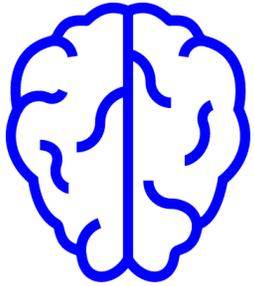

Starting Matrix

SMx Oral Fluid

REF 35400-SMX-OF(F)

Our Specialty Matrix (SMx) Oral Fluid is a synthetic product designed specifically to mimic real human Oral Fluid while eliminating unwanted endogenous analytes. SMx Oral Fluid is an alternative to buffer solutions that are not representative of human saliva.

SMx Oral Fluid can be used on any testing platform, including LCMS, LC-MS/MS, GCMS, and Time of Flight (TOF).

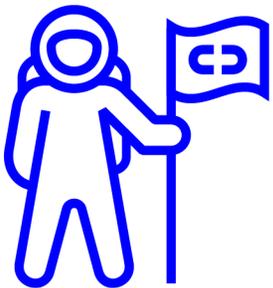

You have a QC vision.

You've envisioned a future where QC is less risky, with fewer lab errors, less waste, and no more time spent re-running samples.

We know how to create control.

And we love the challenge of making your vision a reality. Small batches or large, one analyte or dozens, in any matrix you choose.

Together, we deliver the results you need.

We care about your results. Helping you achieve the accuracy you depend on is what makes us a *different* kind of control freak.

Personalized Custom Controls

You've told us time and time again that making QC is a hassle.

It's no fun at all. You'd rather spend your time developing exciting new methods or running patient samples.

And it's risky, too: The slightest error can cost your lab time and money.

Making QC may be the least exciting part of your day, but for Control Freaks like us, giving you control is the best part of what we do.

If you need a control that's not in our catalog, we'll work with you to design it. Creating controls you can't find anywhere else is how we got our start back in 1973; it's still the heart of what we do, nearly half a century later.

We've made it easier than ever to request a personalized control:

1. Contact our Control Freaks through phone, email, fax, or our website.
2. Answer a few quick questions about the matrix, analytes, and volume you need.
3. Our Control Freaks source the purest compounds and highest-quality materials to design your control.
4. Within a few days, we'll provide a quote for a control especially formulated to match your needs.
5. Using the same precise, nimble manufacturing techniques we use for our readily-available, off-the-shelf products, we'll make your vision come to life.
